Datacolor's REACH Compliance

Datacolor is fully aware of the requirements of **REACH** ("Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (**REACH**)"). Datacolor 's long standing policy is to provide products and services that are safe to use and environmentally sound throughout their lifecycle. It is our intention to fully comply with the legal requirements and to allow a smooth transition to compliance with the minimum of disruption to our customers and relevant stakeholders.

Datacolor products would be considered downstream under the **REACH** definitions and therefore have no pre-registration or registration obligations under **REACH**.

It is our intention to:

▪ Identify all substances within our products and ensure that our suppliers (manufacturers or distributors) pre-register these substances between 1 June 2008 and 1 Dec 2008.

▪ We will work closely with our supply chain in order to minimize and manage any potential risks associated with Substances of Very High Concern (SVHC).

▪ We will communicate sufficient information to relevant stakeholders in order to provide information on identified uses within the meaning of **REACH**.

▪ To follow instructions on Safety Data Sheets and information provided on exposure scenarios.

▪ Provide our customers with information regarding hazards, risks and safe conditions of use of our products through Material Safety Data Sheets.

If you have any questions or concerns regarding Datacolor's compliance with **REACH**, you should direct them to Jan Demeestere. He has access to a global team working on **REACH** and will be the conduit for any questions. His contact information is as follows:

Jan Demeestere,
Global Service Operations Manager
