

Enabling adapt concentration option against a recipe.

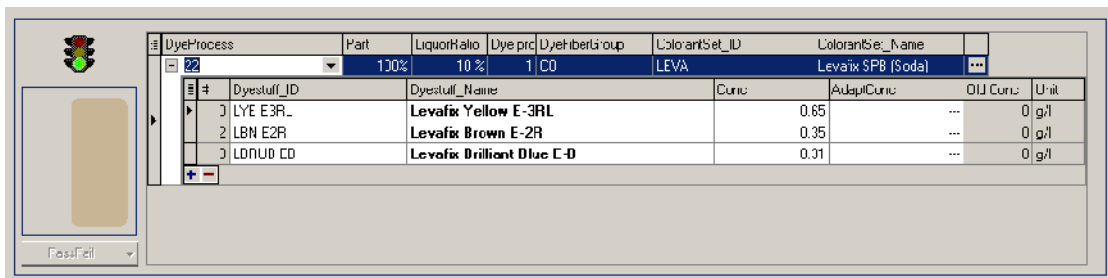

- Log into Datacolor Process.
- Open the list of recipes and then select any recipe.
- On the recipe screen click on the small 'list' icon just above the recipe grid.

- A list of options will be shown. As shown below.

- Select (tick) Adapt Conc.
- The Adapt Conc column will now be shown.

- This setting is stored locally and so the option will need to be enabled for each workstation.
