

## Paint 2 Creating Customer files\Job Descriptions:

Custom Matches can now be given a color name and description if wanted. (The default name is Custom). This will print on the customer's label if you have selected that option in label Management. The name will also be saved in your customer files.

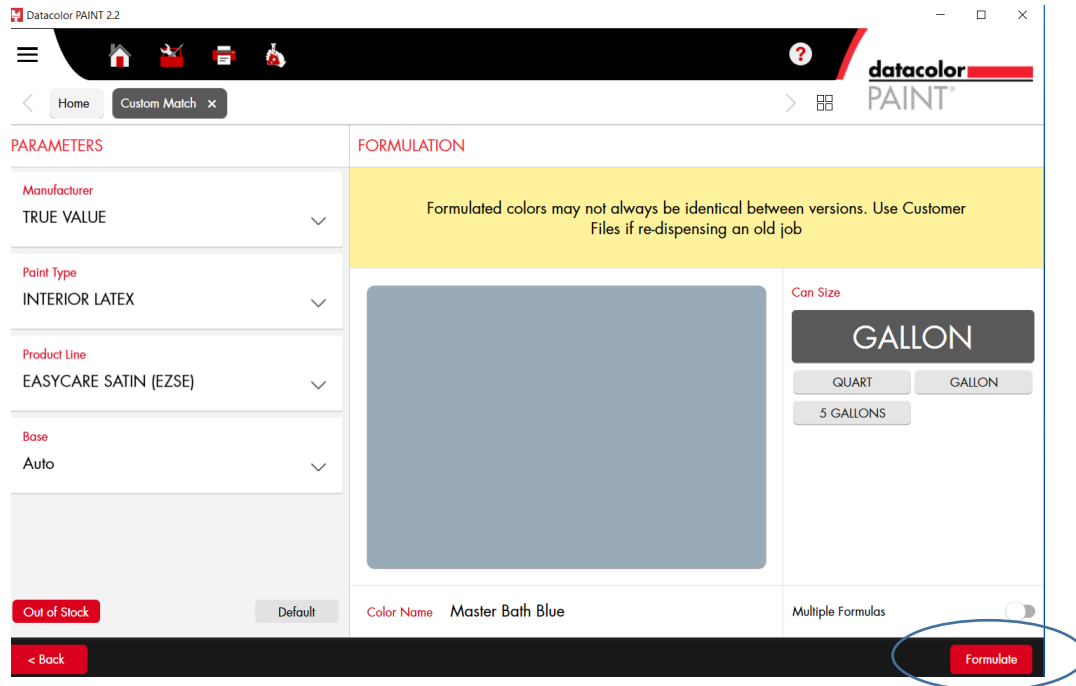

Enter the color name, Select Measure.

The screenshot shows the Datacolor PAINT interface. The top navigation bar includes a home icon, a 'Custom Match' tab, and the Datacolor logo. The main content area is divided into three columns. The left column displays instrument information: 'INSTRUMENT (DATACOLOR)', 'Information: Corp.: Datacolor, Model: DC200, Serial ID: 8811625', and a 'Calibrate' button. The middle column is titled 'MEASURE COLOR SAMPLE' and 'STEP 1', with instructions: 'Make sure that the sample is clean, opaque and solid color'. Below this is a dashed box labeled 'Measure the sample'. The right column shows 'MEASUREMENTS (AUTO AVERAGE)' with a count of 0, a red 'Measure' button, and 'Delete last measure' and 'Delete all measures' buttons. At the bottom, there is a 'GLOSS' section with values '20° : 0.00 - 60° : 0.00 - 85° : 0.00' and an input field labeled 'Enter a color name'. A 'Select Product >' button is visible at the bottom right.

## Select Product

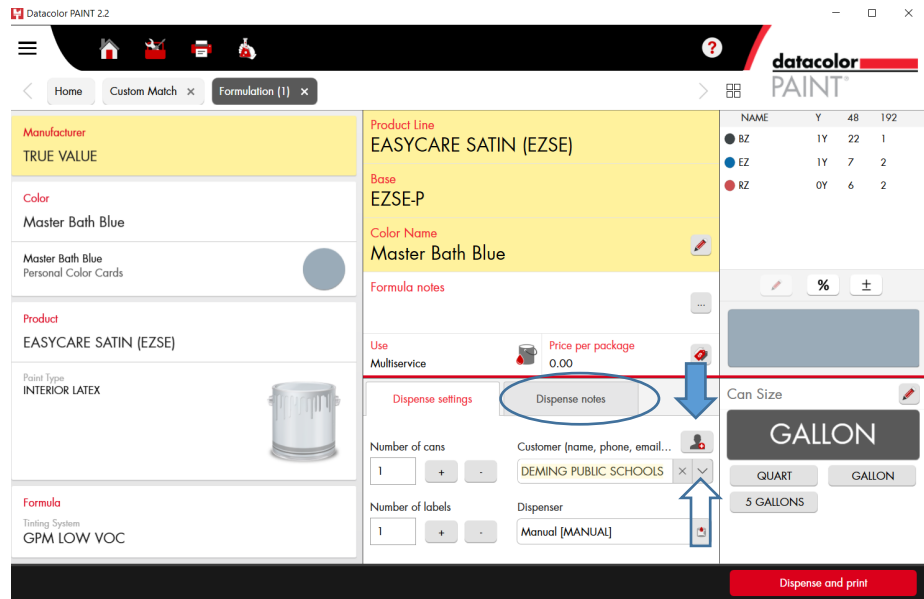

The screenshot shows the Datacolor PAINT interface after a measurement. The 'Measure' button is now disabled, and the 'MEASUREMENTS (AUTO AVERAGE)' count is 1. The 'GLOSS' section now displays values: '20° : 5.31 - 60° : 2.31 - 85° : 0.20'. The 'Enter a color name' input field now contains the text 'Master Bath Blue'. The 'Select Product >' button at the bottom right is now highlighted with a red background and is circled in blue.

Select your manufacturer, Paint type, Product line, Can size. Select Formulate

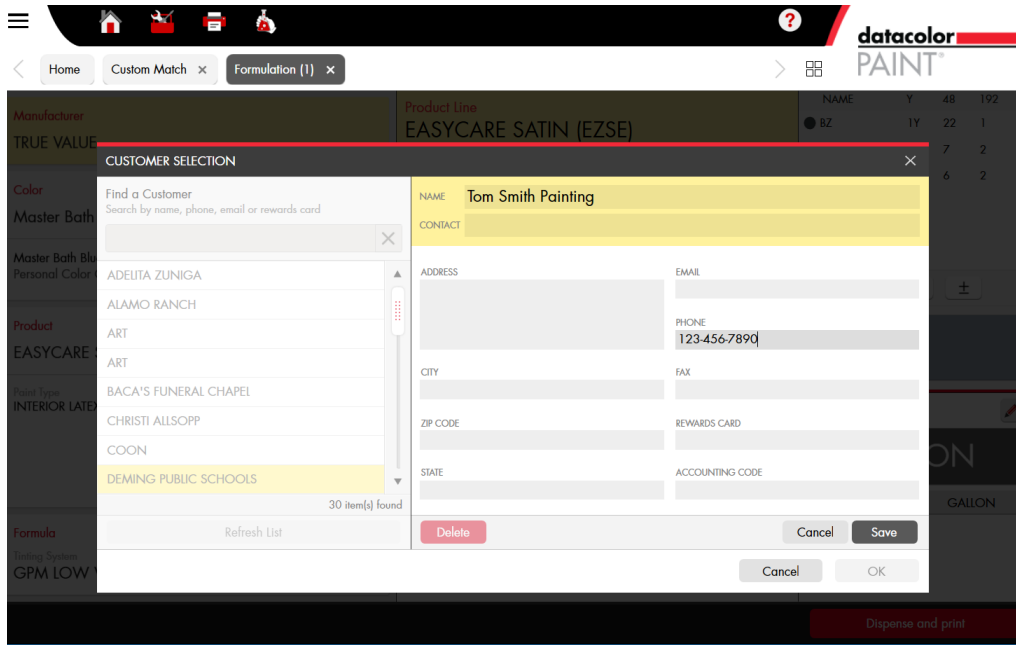

### Dispense Notes:

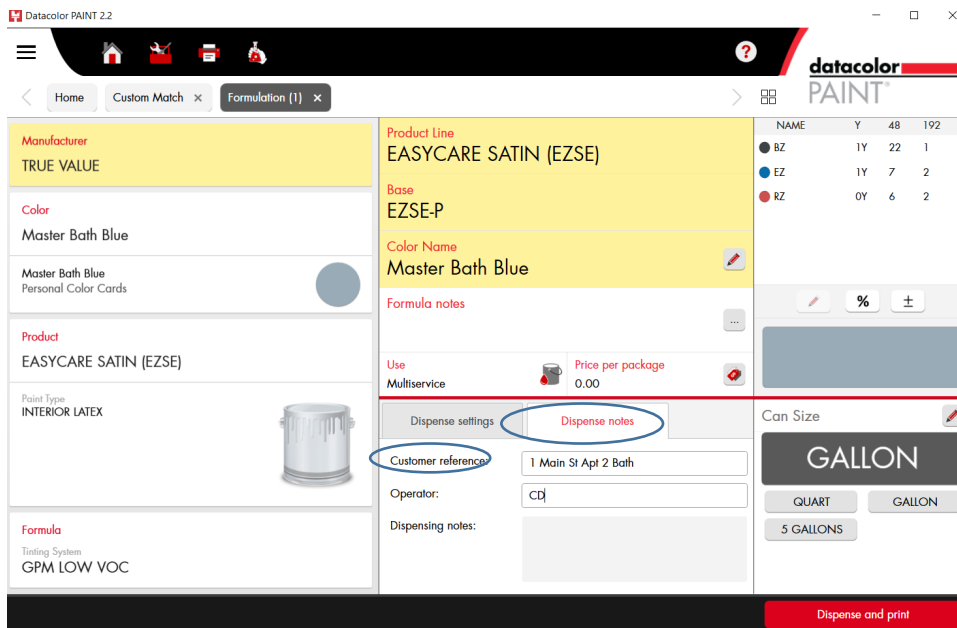

If you are saving to an existing customer, start typing the name in the customer name field and select the name. You can also select the down arrow to view the list of customers.

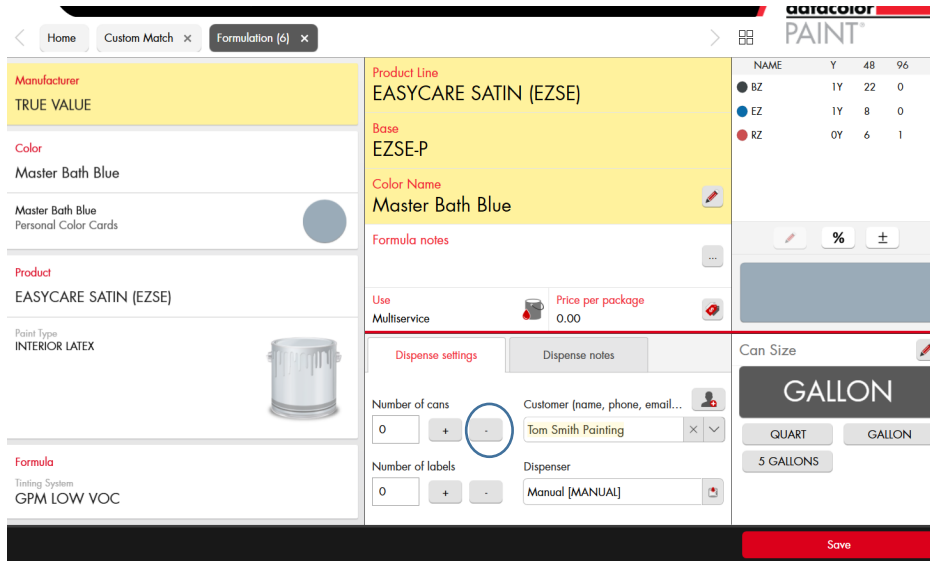

To create a new customer record. Click on the picture of the person head. Fill in the name and phone number at the very least. Select Save then OK.

To enter the job description select Dispense notes. Enter the notes in the Customer reference field. If you want the Operator's initials on the label put them in the Operator line. When you select Dispense and Print the customer file is saved.

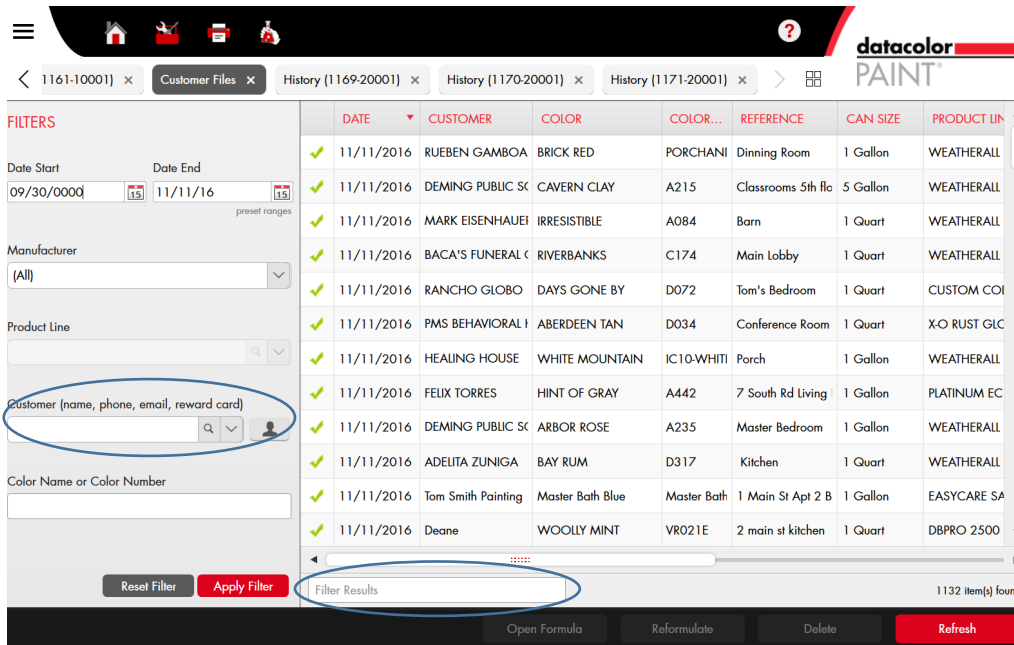

You can also save the customer file without Dispensing and Printing by selecting the - tab next to “The number of Cans” then click Save.

When Customer Files are opened you can see the job description under the “Reference tab” on the screen.

Using the search fields, the customer files can be searched by customer name, a color name, number or job description under the Filter Results. Select apply Filter after selecting the customer name. To reset select Reset Filter.

To open a customer formula click on the customer record then select Open Formula.

The screenshot displays the Datacolor PAINT software interface. At the top, there is a navigation bar with a home icon, a search icon, and a help icon. Below this is a breadcrumb trail showing the current location: < 1161-10001 > Customer Files > History (1169-2000) > History (1170-2000) > History (1171-2000) >. The main content area is divided into a left-hand 'FILTERS' panel and a central table of records. The 'FILTERS' panel includes sections for 'Date Start' (09/30/00 to 11/11/16), 'Manufacturer' (All), 'Product Line', 'Customer (name, phone, email, reward card)', and 'Color Name or Color Number'. Below the filters are 'Reset Filter' and 'Apply Filter' buttons. The central table has columns for DATE, CUSTOMER, COLOR, COLOR..., REFERENCE, CAN SIZE, and PRODUCT LINE. The second row is highlighted in yellow. At the bottom of the interface, there is a 'Filter Results' field and a '1132 Item(s) found' indicator. A row of action buttons is located at the very bottom: 'Open Formula', 'Reformulate', 'Delete', and 'Refresh'. The 'Open Formula' button is circled in blue.
